## Professional Summary

I am a recent graduate of the Software Engineering course at Moringa School, seeking an internship opportunity to apply and grow my skills in web development. I have hands-on experience building responsive web applications using technologies like React, JavaScript, Next.js, and Flask. Passionate about learning and contributing to real-world projects as I start my career in software engineering.

# Technical Skills

## Frontend

- ✓ HTML5, CSS3
- ✓ JavaScript (ES6+)
- ✓ React.js
- ✓ Next.js Framework
- ✓ Responsive Design

## Backend

- ✓ Python/Flask
- ✓ RESTful APIs

## Database

- ✓ SQL & PostgreSQL

## Tools & Methods

- ✓ Git & GitHub

# Professional Experience

## Software Engineering Graduate

Moringa School, Nairobi, Kenya

2024-2025

- Completed intensive software engineering program covering frontend and backend development.
- Built real-world projects using React, Next.js, Flask, and SQLAlchemy.
- Collaborated with peers to develop and present full-stack applications.
- Gained practical experience in REST API development, authentication systems, and responsive UI design.

# Projects

## Medsphere Hospital Management System

A hospital management platform built with Flask and Nextjs to manage patients, doctors, and appointments.

Flask

Next.js

Tailwind CSS

SQLAlchemy

## Movie Browser

A comprehensive movie discovery platform built with Next.js that allows users to search, explore, and save their favorite films. Integrated with TMDB and OMDb APIs, the platform features real-time search, personalized recommendations, watchlist management, and user authentication for a seamless movie browsing experience.

Next.js

React

TMDB API

OMDb API

Tailwind CSS

Firebase Auth

## Personal Portfolio Website

A professional personal portfolio website showcasing projects and skills, built using HTML, CSS, and JavaScript. Designed to highlight work experience and contact information in a responsive layout.

HTML

CSS

JavaScript
